

A case-study on Cable & Wire Industry

About the Organization

This company began in 1977 when one of its promoter set out with a small team of assiduous minds to fulfil his vision of becoming a leading player in the wheels & Castors industry. What began in a small industrial shed has transformed into a global leader providing cost-effective solutions.

Since then the Company has been growing by leaps and bounds in all spheres of it's functioning. They have built a wide and extensive network of distributors across the globe. They have exponentially increased their product offerings. They have multiplied the employee numbers and brought in experts to serve their customers.

Challenges

They were facing problems in:

- To reduce costs while improving quality
- Respond to customer needs and market demands
- Make a profit.

Increasing and more complex demands from trading partners, and growing involvement from overseas have made it imperative for the organization to take on a larger role in the supply chain.

Our Dynamics Solution

- Automating manufacturing processes helped in streamlining operations, increase production & saving money.
- Forecasting requires access to accurate, critical data. With visibility into real-time data, company improved the accuracy of forecasts and better managed production
- Sharing data is increasingly important in the supply chain. With fast, flexible access to the data, company could efficiently share important information to streamline interactions and maintain optimum productivity.

Business Benefits

- Simplified Manufacturing processes
- Agile to market demands

- Increased operational efficiency
- Improvement in the bottom line
